## Unified Command for Your Entire Firewall Fleet

Monitor, manage, and automate multiple firewalls from a single pane of glass. Simplify compliance, accelerate deployments, and gain real-time visibility across all your sites

## Streamline Your Security Operations

True Visibility	Automated Operations	Deep Analytics
<p>Stop jumping between IP addresses. Get a comprehensive view of your entire security posture instantly.</p> <ul style="list-style-type: none"> <li><b>Global Dashboard:</b> View Online/Offline status and active alerts.</li> <li><b>Interactive Maps:</b> Visualize firewalls by Site location.</li> <li><b>Live Metrics:</b> Real-time CPU, RAM, and Active User counts.</li> </ul>	<p>SF Firewall Management lets you execute changes across hundreds of devices simultaneously.</p> <ul style="list-style-type: none"> <li><b>Bulk Updates:</b> Create IP/MAC Hosts and FQDN Groups in one click.</li> <li><b>Policy Management:</b> Standardize Service Groups &amp; Protocols (TCP/UDP/ICMP).</li> <li><b>Mass Password Rotation:</b> Secure your fleet by changing Admin passwords globally.</li> </ul>	<p>Turn raw logs into actionable business intelligence with executive reporting.</p> <ul style="list-style-type: none"> <li><b>Executive Summaries:</b> Health Scores, Uptime %, and Threat Summaries.</li> <li><b>Performance Trends:</b> 24-hour history of CPU, Memory, and Disk usage.</li> </ul>

## Enterprise-Grade Control

### Detailed Asset Management

Know exactly what you have and where it is. Prevent license lapses and hardware surprises.

- License Tracking:** Track Base Licenses and Modules (Web, Mail, Sandstorm) with expiry countdowns.
- Hardware Insights:** Automatic tracking of Model, Serial Number, Firmware, and HA Status.
- Interface Monitoring:** Real-time bandwidth monitoring (Mbps/Gbps) for specific network interfaces.

Firewall	Site	Status	Health	CPU	RAM	Connections	HA	Last Seen	Actions
SF-CHANGI-FW02 172.31.31.2:4444	Changi Edge	Online	Healthy	2%	42%	3%	Not Applicable	23/01/2026 15:44:32	👁️ ⚙️
SF-CHANGI-FW70 172.31.31.4:4444	Changi Edge	Online	Healthy	9%	42%	18%	Standalone	23/01/2026 15:44:32	👁️ ⚙️
SF-MARINABAY-FW04 172.31.31.4:4444	MARINABAY	Online	Healthy	3%	38%	3%	Not Applicable	23/01/2026 15:44:32	👁️ ⚙️
SF3-ORCHARD-FW03 172.31.31.3:4444	Orchard HQ	Online	Healthy	3%	37%	2%	Not Applicable	23/01/2026 15:44:32	👁️ ⚙️

### Governance & Security

Built for teams, not just individuals. Ensure compliance with strict access controls.

- Granular RBAC:** Pre-defined roles for Admins (Full), Operators (Manage), and Viewers (Read-only).
- Site-Based Segregation:** Assign Operators to specific Sites to limit scope.
- Audit Trails:** Capture every user action, resource change, and login event for compliance.

Timestamp	User	Module	Action	Details	IP Address
2026-01-12 09:48:09	admin@localhost	Users-management	Users-Management Created	-	172.18.0.2

# Extensive Bulk Action Library

Don't just monitor—manage. Execute over 20 distinct operation types across your entire fleet instantly.

		
<p><b>Network Objects</b></p> <p>Standardize your network definitions across all sites.</p> <ul style="list-style-type: none"> <li>● <b>IP &amp; MAC Hosts:</b> Create/Update/Delete.</li> <li>● <b>FQDN Support:</b> Includes wildcard support (*.domain.com).</li> <li>● <b>Group Management:</b> Sync Host Groups globally.</li> </ul>	<p><b>Service Definitions</b></p> <p>Precise protocol management for your firewall rules.</p> <ul style="list-style-type: none"> <li>● <b>Multi-Protocol:</b> TCP, UDP, ICMP, &amp; ICMPv6.</li> <li>● <b>Custom Ranges:</b> Define specific ports or ranges.</li> <li>● <b>Service Groups:</b> Bundle services for easier policy application.</li> </ul>	<p><b>Admin &amp; Safety</b></p> <p>Execute critical changes with built-in safeguards.</p> <ul style="list-style-type: none"> <li>● <b>Mass Password Rotation:</b> Secure fleet-wide credentials instantly.</li> <li>● <b>Smart Retry:</b> Re-run only failed tasks from history.</li> <li>● <b>Live Logs:</b> Real-time success/failure feedback per device.</li> </ul>

## System requirements - Minimum Hardware

Component	Minimum	Recommended
CPU	4 cores	8 cores
RAM	8 GB	16 GB
Disk	50 GB SSD	100 GB SSD
Network	100 Mbps	1 Gbps

**Supported Firewall:** Sophos XGS/XG Firewall with SFOS version 18 and above

**Subscription by device and type of firewall (desktop, 1U, 2U):**

- SF Firewall Management Essential - Desktop - 1Y/2Y/3Y
- SF Firewall Management Essential - 1U - 1Y/2Y/3Y
- SF Firewall Management Essential - 2U - 1Y/2Y/3Y
